

PLANT RELOCATION SERVICES

DISMANTLE. RELOCATE. DECOMMISSION

OPPORTUNITIES & CHALLENGES ADDRESSED

Study, plan, and initiate seamless facility migration

Leverage LTTS' engineering and construction capabilities to analyze plant equipment and process with respect to layout and orientation to seamlessly relocate a plant within defined requirements and geographical constraints

Dismantle and safely move plant equipment

Avail LTTS' documentation expertise, constructability review, and logistical support to regulate, supervise, and streamline the entire migration process

Create an extended engineering center in best cost region with minimal investment

Utilize LTTS' engineering and construction support capabilities to free up and reallocate enterprise resources for critical strategic initiatives
